

MAY 18 1990

INTEROFFICE CORRESPONDENCE

DATE May 18, 1990 OE-05-90
TO G. M. Anderson
FROM O. Erlich *OE*
SUBJECT RESPONSE TO YOUR REQUEST TO FIND THE STANDARDS APPLIED FOR
STRONTIUM DISCHARGE LIMIT FOR WOMAN CREEK.

There is no standard discharge limit for Strontium 89, 90 in the surface water specified in the State of Colorado Water Standards published by the Colorado Department of Health Water Quality Control Commission of the State of Colorado on February 15, 1990 have been found.

However, the State of Colorado Water Standards published by the Colorado Department of Health Water Quality Control Commission of the State of Colorado on August 17, 1990 has specified the surface water discharge for Strontium 90 - 8 picocuries per liter (pCi/L). No Standard for Strontium 89 have been found in this document.

Attached are the copies of the pages from both documents related to this matter.

Please let me know if you have any question.
